Summary

Aspiring web developer with a strong foundation in full stack development and a master's degree in mathematics. Passionate about creating responsive, user-friendly web applications using modern technologies. Committed to continuous learning and improvement in both front-end and back-end development.

Education

- **Master's Degree in Mathematics**
  Western Governor University
- **Bachelor's Degree in Mathematics**
  Addis Ababa University
- **Full Stack Development Training**
  EVANGADI
  2024

Skills

- **Front-End Development**
  Proficient in HTML, CSS, Bootstrap, React, and Vite for building modern, responsive user interfaces. Strong understanding of responsive design principles, cross-browser compatibility, and creating dynamic web applications using React Hooks and state management.
- **Back-End Development**
  Knowledgeable in Node.js and Express for building robust back-end systems. Experienced with creating and managing APIs, handling HTTP requests, and working with databases to deliver full stack solutions.
- **Version Control & Collaboration**
  Proficient in using Git for version control, with experience working both independently and as part of a collaborative team in Agile environments.
- **Build Tools & Optimization**
  Skilled in using Vite for fast project setup and optimization, focusing on performance improvements to deliver efficient, high-speed web applications.

- **Database Management**
  Familiar with working with MySQL and MongoDB databases for handling data storage, retrieval, and management in web applications.
- **Problem-Solving & Attention to Detail**
  Excellent problem-solving skills, with a strong attention to detail in designing user-friendly interfaces, ensuring cross-device compatibility, and optimizing applications for performance.

Projects

- Developed a responsive website using HTML, CSS, React, and Bootstrap.
- Implemented custom styling and layout techniques to enhance user experience.
- Ensured compatibility across various devices and screen sizes.
- Developed a responsive Apple website page using HTML, CSS, and Bootstrap.
- Created a portfolio website to showcase skills and projects.
- Designed and implemented custom CSS effects and animations.
- Optimized website performance for fast loading times.
- Built an Amazon clone using React, showcasing e-commerce functionalities such as product listings, shopping carts, and user authentication.
- Developed a Netflix clone, implementing features such as dynamic content display using React, API integration, and a responsive layout for an enhanced user experience.
- Created the Evangadi web page, focusing on responsive design and user interaction, along with a user-friendly interface.
- Completed various projects during training, gaining hands-on experience with front-end, back-end, and full-stack development, including the use of React, Node.js, Express, and MySQL.
- Utilized Vite for project setups, enabling faster builds and optimized performance in web applications.

Certifications

- Full Stack Developer [October, 2024]
